

Bar Benders

Model 062

Features 4-position quick cam action clamping.

Model 042

Uses full vice clamping with double spring return.

Advantages

- Super strong, NZ made, manually operated metal bender
- Cold bending of Flat, Square or Round section
- Quick, easy and accurate to use
- Two models:
 - 062 has 4 position cam for quick action clamping,
 - 042 has full vice type clamping action for superior clamping
- Both Benders can be directly bench mounted, or mounted on a purpose-made Bramley stand (sold separately).
- Replacement parts readily available

Details

- Solid cast iron and spheroidal graphite castings for maximum strength
- Fully adjustable angle stops for bending, from 0° to 90°
- Swivel bending plate adjusts against steel being bent for sharp bend radius

Optional Extras

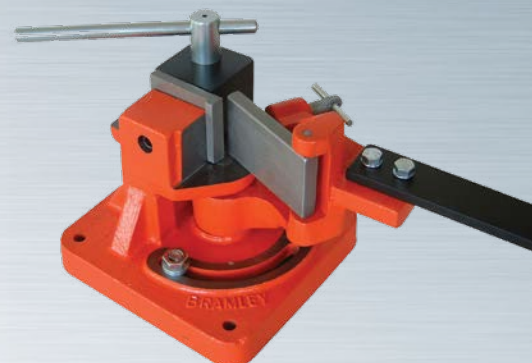

- Purpose-made Bramley stand (Model 060 - sold separately).

Specifications

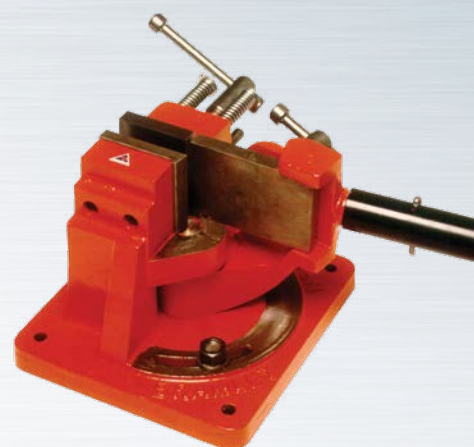

MILD STEEL	062	042
Capacities in Cold Material		
FLAT BAR	80 x 6mm or 60 x 8mm or 30 x 12mm	100mm x 8mm or 60 x 10mm or 50 x 12mm
SQUARE	20 x 20mm	25 x 25mm
ROUND	Ø 20mm	Ø 25mm
Shipping	44kg / 0.045m ³	68kg / 0.2m ³

Capacities are rated on volume of steel to be bent. (i.e. as height is increased, width must be correspondingly decreased)

Model 062

Model 042

Model 042 mounted onto optional stand Model 060

Questions to ask when purchasing

What size material are you bending?
How are you going to mount the Bender?
Is speed of clamping important?

Is accuracy of bend important to you?
Do you want a long life working life of the product?
Is having readily available spares important to you?
